Qualora ci fosse un contatto prossimale stretto, separare con un cuneo o con un anello di ritenzione.</p>	<p>Alla fine della preparazione, l'InterGuard si smetterà. Se necessario, stabilizzare con un dito o stabilizzare durante l'intera procedura con un anello di ritenzione (in questo caso, girare le parti curve dall'altra lato rispetto alla preparazione). Per evitare la contaminazione crociata non riutilizzare.</p>	<p>Undgå aspiration: Brug kofferdam eller bind et stykke tandtråd (18 cm) InterGuard.</p>	<p>Juster afstanden mellem spiralerne for at opnå god rettent. Ved tæt kontakt separer med en kil eller en sektionsring.</p>
<p><b>Spanish</b></p> <p>Para prevenir la aspiración, utilice un dique de goma o hilo dental (18cm).</p>	<p>Coloque el InterGuard entre los dientes. Ajuste los lados retrócedidos para que se fijen firmemente. Con el contacto cercano ajustado, separe con una cuña o un anillo de contención.</p>	<p>Al final de la preparación, InterGuard se aflojará. Si es necesario, asegure con un dedo o asegure durante el procedimiento completo con un anillo de contención (en este caso doble los lados retrócedidos hacia el lado contrario a la preparación). No lo reutilice, así evitará la contaminación cruzada.</p>	<p>Ehkäistäksesi sieniulun joutumista käytä kofferdamia tai hammaslankaa (18 cm).</p>	<p>Aseta InterGuard hampaiden välillä. Säädä kiharat siten, että ne sijaitsevat tiukasti hampailla vasten. Jos hampaiden proksimaalinen välillä on ahdas, levitä kihalla tai pidäkerkaalla.</p>
<p><b>Portuguese</b></p> <p>Para evitar aspiração, use dique de borracha ou fio dentário (18cm).</p>	<p>Coloque o InterGuard entre os dentes. Aperte bem os porta matriz para um perfeito ajuste. Com uma contacto proximal apertado separe com uma cunha ou com uma matriz metálica.</p>	<p>No final da preparação InterGuard desprendeu-se. Se necessário estabilize com um dedo ou estabilize durante todo o processo com uma matriz metálica (neste caso coloque os porta matriz afastados a preparação). Não reutilizar para evitar a contaminação cruzada.</p>	<p>Tοποθετείστε το InterGuard μεταξύ των δοντών. Προσδοκόμετε τις συντροφές για σταθερή εφαρμογή. Σε σφιχτή μεσητή επαρχή διαχωρίστε με μια σφήνα ή ένα δακτύλιο συγχράτησης. (18cm).</p>	<p>Το InterGuard χαλαρώνει μετά το πέρας της προετοιμασίας. Εάν χρειάζεται σταθεροποίηση με το δάκτυλο ή σταθεροποίηση καθόλη τη διάρκεια της διαδικασίας με ένα δακτύλιο συγχράτησης (σε αυτή τη περίπτωση στρέψτε τις συντροφές μακριά από την προετοιμασία). Μην τη επαναχρησιμοποιείτε για να αποφύγετε τη διασταυρωτική μολυνση.</p>

# InterGuard®

## Description & Indications:

InterGuard® is a preventive aid for operative dentistry. It is used to protect adjacent teeth from iatrogenic preparation damage. InterGuard is designed for autoclave and dry heat sterilization. Made of stainless steel with a curl at each end, InterGuard fits snugly in both large and small interproximal spaces. InterGuard is available in two heights:

- 4.0mm for short anatomical crowns.
- 5.5mm for tall anatomical crowns.

## Procedure:

1. To prevent patient from accidentally swallowing InterGuard use a rubber dam or fasten a piece of dental floss through the hole on the side of InterGuard. To aid in retrieval make sure that the floss hangs no less than 7-inches outside of mouth.
2. Adjust the space between the curls with your fingers to allow InterGuard to fit firmly between the teeth.
3. Place InterGuard with curls toward the tooth to be prepared (Fig. 1). The curls keep the InterGuard clear of the transition angles, allowing full access to the area to be prepared.
4. With tight proximal contacts, use wedges

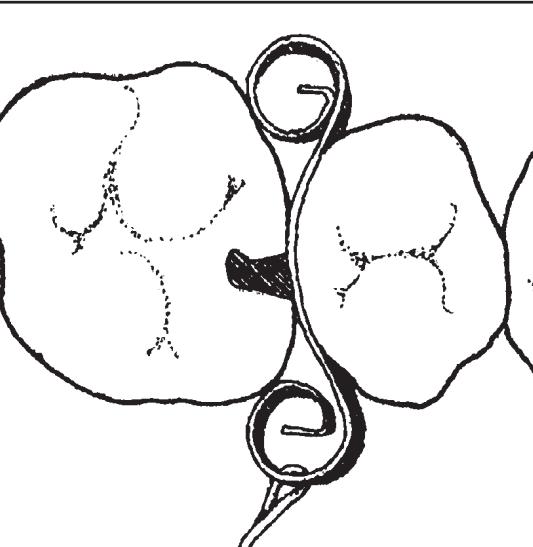

Fig. 1 Place InterGuard curls toward the tooth to be prepared.

to simplify placement or separate with a retaining ring.

Note: At the end of preparation, InterGuard will loosen. If necessary, stabilize with a finger or InterGuard may be stabilized during the entire procedure with a retaining ring (in this case turn curls away from the tooth being prepared).

## Precautions:

1. Always isolate the preparation area with a rubber dam or ligate InterGuard with a 7-inch length of dental floss to prevent aspiration.
2. For professional use only.
