

Get More Confidence in Your Smile

Your smile says more about you than any other physical feature. It's the first thing people notice. Wouldn't it be great to have a simple method for whitening your smile in an affordable treatment that's convenient enough to take with you anywhere?

Good news! Now you can have the bright, white smile you've always wanted for a price that is much more affordable than you may think. Introducing Opalescence Go, the easiest, fastest, and best-tasting way to brighten your smile. Offering professional results in the convenience of pre-loaded disposable trays, Opalescence Go is perfect for patients on the go.

WARNING: Some users may experience sensitivity. If this occurs, it is most often mild and transient but in some cases may require treatment by your dentist.

If you experience significant discomfort, stop using this product and consult your dentist. If you have any questions about this product or treatment, please ask your dentist.

INSTRUCTIONS

professional whitening to go

10% Mint Ingredients:
Glycerin, Water (aqua), Carbomer, Hydrogen Peroxide, Urea (Carbamide) Peroxide, Sodium Hydroxide, PVP, Silica, Xylitol, Disodium Phosphate, Potassium Nitrate, Sucralose, Flavor (aroma), Sodium Fluoride, EDTA, Sodium Lauryl Sulfate

10% Melon Ingredients:
Glycerin, Water (aqua), Carbomer, Hydrogen Peroxide, Urea (Carbamide) Peroxide, Sodium Hydroxide, PVP, Silica, Flavor (aroma), Xylitol, Disodium Phosphate, Potassium Nitrate, Sucralose, Sodium Fluoride, EDTA, Sodium Lauryl Sulfate

INSTRUCTIONS

1. Remove from package
'U' • Upper bleaching tray 'L' • Lower bleaching tray.

2. Center tray on arch.

3. Gently suck down or swallow.

4. Remove outer tray.

5. Suck down or swallow again.

6. Wear 10% for 30 to 60 minutes and 15% for 15 to 20 minutes.

PRECAUTIONS

1. Keep tooth bleaching product away from small children.
2. A dental examination is recommended prior to bleaching. Some discolorations may indicate the need for dental treatment other than bleaching. Porcelain crowns, veneers, and white fillings do not lighten upon bleaching.
3. Only intended for use by those with healthy gum tissue. Gum tissue irritation may result if used in individuals with periodontal disease.
4. This product is NOT for nighttime use.
5. Occasionally, some parts of teeth may bleach faster or less evenly than others. Results may be varied. In approximately 5% of the population, teeth may be resistant to bleaching. Bleaching teeth with large metal fillings may cause the metal color to show through the teeth.
6. Acidic foods/juices may cause sensitivity if consumed shortly after bleaching.
7. Do not use tobacco products or eat while bleaching.
8. Not intended for use by pregnant women. Consult a health care practitioner if you are breast feeding.
9. Keep gel out of heat/sunlight. Do not freeze.
10. Do not swallow gel or rinses. Avoid direct contact of the active surface of the tooth whitening product with the gums and/or salivary flow. Product contains peroxide and may contain fluoride; swallowing large amounts can be harmful.
11. Avoid contact with eyes.
